## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13, drawn to a health care management system, classified in class 705, subclass 2.
  - II. Claims ~~1-13~~<sup>14-28, 31 & 32</sup>, drawn to demand based messaging, classified in class 709, subclass 206.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Invention I has the utility of a healthcare management system that keep track of patients appointment and health record. The subcombination has separate utility such as demand based message system that coordinates messages between different users.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
